Big Day In - a big success

On the last day of Term 3, High School students participated in the inaugural, and overwhelmingly successful, Big Day In.

This major event was a new concept designed to expand the scope of student engagement within their House teams, and to value a broad spectrum of student abilities.

With 16 battles to choose from in both the morning and afternoon, students were able to choose how they wanted to contribute to their House team, according to their areas of interest areas and abilities.

From Soccer to Mario Kart and from Medieval Castle construction to the Amazing Race; every student had a great time battling for as many points as possible, in something they were good at and passionate about.

Schoolyard scores were settled once and for all in the epic Handball Championships (overseen by our fully kitted-out, old-school staff professionals), the Middle and Senior School Basketball titleholders were revealed, and the smartest House was discovered in the Trivial Pursuit General Knowledge Challenge.

Cooking up a storm proved to be a heated contest in the MasterChef Mystery Box Battle,

the creatives were judged in the Culinary Decoration and the Out of the Box Creative Arts Challenge, whilst Bear Grylls would have been proud to witness students overcome seemingly insurmountable challenges in "You vs Wild".

Students with a flair for Humanities were well catered for in the Bee and Bowl History battle and the Mock Trial, with certain Word Gamemasters being so Articulate™ that they sent their opposition Scrabble™ing for dictionaries.

After a whole High School community sausage sizzle, students poured into the Auditorium for some surprise on-stage battles between their House Captains and House staff members, accompanied by a highlight reel from the day.

So who, in the end, showed the broadest amount of talent overall – coming to the stage and taking out the inaugural Big Day In? First, a brief history lesson.

When the current house teams were established in 2005, Laver won our inaugural High School Sports Day in that year. In 2007, it was Laver who won our first ever High School Swimming Carnival (and has won 6 more times since).

When it comes to firsts, there must be something about the colour yellow!

Enjoying Life in the Middle

There is no denying the extraordinary rate of development that young adolescents experience.

Middle School students seek intellectual challenges, while still developing their thinking capability.

Our staff work hard to provide curriculum that is genuinely challenging, relevant and stimulating for students. Peer approval is commonly valued and sought-after during adolescence and sometimes leads to acceptance-driven decisions. At Cedar we intentionally encourage a variety of peer relationships both within the classroom and the vertical communities. Through the variety of peer connections and positive staff relationships, we endeavour to guide our students in their contributions to the social landscape of the college.

We had many great memories from third term in the Middle School. In Mathematics, Year 7 students put their textbooks away and applied

their math concepts to a range of challenging activities with various physical props. The students made great connections with the concepts as they explored the relationships between scale and proportion.

Acknowledging Academics

At our Academic Assembly, students who sustained consistently high achievement across their subjects were recognised. We value the opportunity to acknowledge the achievements of our students and trust this is one of the many tools that contributes to this. We also appreciated celebrating the sporting success of many teams including the Year 6/7 Soccer team who won their SACSA carnival, the persistence of students during the Science Week challenges, and the learning opportunities during the German excursion.

We have enjoyed reconnecting with the students after their break. It is wonderful to recommence classes with refreshed students. During fourth term, we look forward to finishing strong and helping students to clearly see the growth they have experienced as learners within the Cedar community.

Epic time in Junior Primary

Term 3 was another exciting and busy term in the Primary School.

The Junior Primary children looked forward to their weekly Performing Arts lessons where they used apps on the iPads to compose their own piece of music. They played untuned percussion instruments to create their own four beat pattern and also listened to lots of classical music.

Super-Fun Book Week

There was great anticipation for Book Week in Week 5, where the students came to school dressed up as either a super hero, to fit the theme of *Reading is My Super Power*, or their favourite book character. They enjoyed parading their costumes for parents and friends, and visiting the Book Fair and Art Display in the Library.

Book Week concluded with a visit from many of our grandparents for Grandparents Day.

The children were able to share some of their work, show them around their classroom, participate in some craft or other activities together and even present a special item on stage. This was a very special time as families connected and our grandparents had a glimpse into our life here at Cedar College.

9. Year 2 Sleepover

The Year 2s marked the centenary of the epic first flight from England to Australia by Sir Ross Smith, Sir Keith Smith, Wally Shiers and Jim Bennett by presenting a play for Grandparents Day, and again at the Primary School Assembly. In the photos you can see some of them in costume and with the fantastic Vickers Vimy plane prop created by Marilyn Sakovits (one of our talented SSOs).

To celebrate the 100th year since this epic first flight, the Primary School participated in The Great Air Race. Each child made their own paper plane to fly in the race and they enjoyed challenging their friends to see whose plane would fly the furthest. This event was a lot of fun for the students as they cheered each other on and even got to see their Year 12 Prayer Partners race planes against each other. It was a great success and a wonderful way to celebrate this historic event that took place in our local community.

On the last Thursday of Term 3, the Year 2s had a sleepover at school. They enjoyed some games and activities, a picnic supper, a movie, and pancakes for breakfast. Fun was had by all, and a good sleep by a few!

As we begin Term 4, we often find ourselves consumed in 'to do' lists in preparation for Christmas. My prayer for us all is that we can really enjoy these last weeks of 2019 and find the time amongst our busy schedules to celebrate our children's efforts and achievements and to remember some of the year's highlights.

Discovery in Upper Primary

Term 3 certainly was packed full of activities and discovery, to engage our Upper Primary students.

Book Week, Grandparents day, a MasterChef competition, Year 3 Immersion Week, Year 6 Art Exhibition and the Great Paper Plane Air Race were just some of Term 3's activities!

The Year 6 Art Exhibition was a wonderful experience. Their classrooms were transformed into an exhibition hall, showing off the wonderful and diverse talents of the Year 6 students. Incredible photographs of nature and varying structures, drawings with amazing detail, paintings and an assortment of other artwork were displayed for families to come to visit and enjoy.

The Year 3s embarked on a discovery of some of Australia's neighbours. They researched a neighbouring country, created a village in the classroom, ate only rice, and created some activities for the other year levels to come to visit and enjoy.

Grandparents Day was successful once again, giving students the opportunity to present a short performance with a mixture of song, poetry, dance and even a play.

Our Book Week Parade was a fun time for students to dress up in their favourite

book character and immerse themselves in some award winning books. Many different costumes were presented on stage for our school community to see, and the students thoroughly enjoyed the day.

Great Paper Plane Air Race

Finally, we had a special time when all of the students in R-6 created a paper plane to fly the farthest distance. It was fast, fun and our Year 12 students, who we have been praying for all year, came to join in. Each student threw their plane, with prizes awarded for each year level and an overall winner for Upper and Junior Primary. Mr Klassen nearly succeeded winning the teacher competition, but Year 12 teacher, Mr Petersen, made sure Mr K came second. There's always next year Mr Klassen!

Incredibly, Term 4 is here and with that comes many events on the calendar. We are set for a final term full of engaging activities and learning to complete 2019.
